

**ORYX® Acrylic FR****SAFETY DATA SHEET***Version 1.0, 11-03-2016 (English)***SECTION 1: Identification of the material and the company****1.1 Product identification**

ORYX® Acrylic FR

**1.2 Relevant identified use of the material**

The material:

- Water-based sealant with fire and smoke resistant properties for indoor use

Identified application:

- Fire-resistant joint sealing
- Fire-resistant duct sealing

**1.3 Details relating to the issuer of the safety data sheet**

Dutch Marine Systems BV  
Hoogschaijksestraat 15  
5374 EC Schaijk  
The Netherlands

**SECTION 2: Composition / information content**

Substances that represent a risk to health in the sense of the CHIP guidelines or that are classified according to the Occupational Exposure Limit (OEL):

Name	EINICS no.	Concentration	Symbol*	R-phrases
-	-	-	-	-

\*for full text, see section 16

**SECTION 3: Hazards identification**

Structure of the mix - Regulation EC 1272/2008:

- This product is not classified as hazardous according to Regulation (EC) 1272/2008 (CLP)

Labelling elements - Regulation EC 1272/2008:

- Signal word: None
- Hazard statement: None

**SECTION 4: First-aid measures**

## General:

- If unconscious, place in stable position on the side, do not administer any substance orally.
- In case of doubt or if symptoms persist, seek medical advice.

## Inhalation:

- Remove to fresh air.
- If breathing is irregular or stops, place on artificial respiration.

## Eye contact:

- Remove contact lenses. While eyes are wide open, rinse immediately with plenty of water for at least 15 minutes and seek medical advice.

## Skin contact:

- Remove contaminated clothing.
- Wash the skin thoroughly with soap and water or a recognised skin-cleaning agent.
- Do not use any solvents or thinners.
- Seek medical advice if skin irritation persists.

## Ingestion:

- If swallowed, rinse mouth with clean water, drink plenty of water, and immediately seek medical advice.
- Keep at rest.
- DO NOT induce vomiting .

## Main symptoms and effects:

- Contact with the skin: No symptoms expected.
- Contact with the eyes: Possible irritation and redness.
- Swallowing: No symptoms expected. If symptoms persist, seek medical advice.
- Inhalation: No symptoms expected.

**SECTION 5: Firefighting measures**

The product is not flammable in liquid form.

## Suitable extinguishing agents:

- Carbon dioxide, foam, powder, water / water vapour

Fire can generate thick black smoke that contains hazardous particulates (see section 10). Exposure to these particulates can be hazardous to health. Appropriate respiration equipment and approved protective clothing are mandatory.

Cool packaging exposed to fire using water. Prevent water used for extinguishing from entering the sewerage system or the environment.

**SECTION 6: Accidental release measures**

- Remove non-essential personnel. Avoid contact with skin and inhalation of vapours (see sections 7 and 8).
- This product does not represent any particular risks to the environment
- Remove spilled product with non-flammable absorbent products (e.g. sand). Place waste in marked containers in accordance with local guidelines (see section 13).
- Clean contaminated surfaces with a suitable solvent. Prevent the material from entering the sewerage system or the environment. If the material enters the sewerage system or the environment, alert the local water authority or municipality directly.

**SECTION 7: Handling and storage**
**Handling:**

- Avoid skin and eye contact and inhalation of vapours.
- Smoking, eating and drinking must be avoided in storage areas. Wash hands before breaks and after work. For personal protection, see section 8.
- Keep containers closed when not in use.
- Never use air/oil pressure to empty the product as the packaging is not designed for this.
- Ensure a clean workplace and safely remove waste materials on a regular basis.
- Keep an eye on the maximum weight if the product is being moved or used manually.

**Storage:**

- Observe instructions on label.
- Store in the original sealed packaging between +5°C and +25°C in a dry location away from heat sources. Protect against frost.
- Do not store the product near food, drink or animal feed. Keep out of the reach of children.
- Keep the product away from oxidising agents and strongly alkaline or acid substances.

**SECTION 8: Measures to manage exposure / personal protection**
**Occupational Exposure Limits (OELs):**

Substance	OELs			
	8 hours (1)		15 minutes (2)	
	ppm	mg/m <sup>3</sup>	ppm	mg/m <sup>3</sup>
	-	-	-	-

(1) Exposure limit over the longer term – 8 hours on average

(2) Exposure limit over the shorter term – 15 minutes on average

**Managing exposure:**

- Where possible, apply and dry only in adequately ventilated areas. This must be done using on-site extraction. If this is not adequate, use appropriate respiratory equipment (see below).

**Personal protection:**

- Contact the local supplier of Personal Protective Equipment for advice on choosing adequate equipment for the work setting concerned.
- All Personal Protective Equipment (PPE), including breathing apparatus, used to prevent exposure to hazardous substances must comply with current legislation.

**Breathing protection:**

- If exposure to hazardous substances as stated in Section 8 cannot be controlled with natural ventilation, e.g. when working in closed areas, the air supply must be regulated using mechanical ventilation, insofar as that is practically possible. If this is not possible, respiratory equipment must be used.

**Hand protection:**

- If there is a risk of exposure to skin, a glove supplier must be consulted as to which type of glove is best to use. The instructions and information given by the supplier on the use, storage, maintenance and replacement of the gloves must be followed. Cream can be used to protect the exposed skin, but this is not suitable. Do not use cream after exposure.

**Eye protection:**

- Wear appropriate eye protection designed to protect against splashing liquids in line with EN 166.

**Skin protection:**

- Cotton or cotton/synthetic overalls may be used. Very contaminated clothing must always be removed and the skin washed with water and soap or a recognised skin cleaner. Always wash your hands before eating, smoking or using the toilet.

**SECTION 9: Physical and chemical properties**

- a) Physical condition: viscose paste
- b) Flash point.: above 100 °C
- c) Specific density: 1.60 – 1.64 g/ml (20 °C)
- d) Colour: white
- e) Solubility in water: mixable
- f) pH: 7.7 to 8.5

**SECTION 10: Stability and reactivity**

- Reactivity: No data available
- Chemical stability: Stable under recommended storage and usage conditions (Section 7).
- Possible hazardous reactions: None known.
- Circumstances to be avoided: See Section 10.
- Incompatible materials: see Section 10.
- If exposed to high temperatures, hazardous substances may be released, such as smoke, carbon dioxide, carbon monoxide and nitrogen oxides.
- Keep away from oxidising agents and strongly alkaline or acidic materials to prevent exothermic reactions.

**SECTION 11: Toxicological information**

There is no evidence that the product has any toxicological effects.

- Swallowing: May cause stomach cramps if swallowed.
- Contact with the skin: May irritate the skin.
- Contact with the eyes: Risk of irritation of the eyes.
- Sensibilisation: Not sensibilising.
- STOT: Not classified.

**SECTION 12: Ecological information**

- Ecotoxicity: Considered non-hazardous to the environment. Not considered toxic to fish.
- Persistence and biodegradability: The product is not biodegradable.
- Bio accumulation: No potential for bio accumulation
- Mobility in the soil: Not mobile.
- Results of PBT and zPzB assessment: Not classified as PBT / vPvB.
- Other hazardous effects: None known.

**SECTION 13: Instructions for disposal**

Waste is classified as controlled waste and must be disposed of in accordance with environmental regulations.

Do not discharge into open water or into the sewerage system.

**SECTION 14: Information relating to transport**

This product is not classified in accordance with international regulations for the transport of hazardous goods.

Transport on-site - always transport upright in sealed packaging. Ensure that those who transport the product know what they have to do in the event of a calamity.

UN number:

- N/A

Correct technical name:

- N/A

Transport risk class:

- N/A

Packaging group:

- N/A

Environmental risks:

- Not classified as a water pollutant

Special preventive measures for users:

- N/A

Further transport after purchase:

- Transport in accordance with ADR for road, IMDG for sea and the ICAO / IATA for air transport.

### **SECTION 15: Regulatory information**

Safety, health and environmental regulations / legislation for the substance or mix:

- Control of Substances Hazardous to Health Regulations 1999
- Environment Act 1995
- Management of Health and Safety at Work Regulations 1999
- Personal Protective Equipment at Work Regulations 1992
- Special Waste Regulations 1996 as amended

HEALTH AND SAFETY REGULATIONS:

HS(G)37	An Introduction to Local Exhaust Ventilation
EH40	Occupational Exposure Limits
EH44	Dust: General Principles of Protection
HS(G)53	The Selection, Use and Maintenance of Respiratory Protective Equipment
HS(G)71	Storage of Packaged Dangerous Substances
HS(G)193	COSHH Essentials: easy steps to control chemicals
L23	Manual Handling Guidance on Regulations

BRITISH STANDARDS PUBLICATIONS

EN420:	General Requirements for Gloves
EN166:	Personal Eye Protection: Specifications
BS2092:	Eye Protection for Industrial and Non-Industrial Users
BS4275:	Recommendations for the Selection, Use and Maintenance of Respiratory Protective Equipment

Chemical safety assessment:

- Symbols and text of the H phrases, part 2: - None

## SECTION 16: Other information

Symbols and text of the H phrases are given in sections 2 and 3.

This safety data sheet must be used in combination with technical data sheets. It does not replace them. The information provided is based on our knowledge of this product at the date of publication. It is provided in good faith.

The attention of the user is drawn to the potential risks associated with using this product for any other purpose than that for which it was intended.

This does not justify in any way a user operating beyond the knowledge and application of all instructions relating to his activities. It is the responsibility of the user to meet his obligations relating to the use of hazardous products.

This information is not exhaustive. This does not mean the user may negate statutory obligations other than those stated in relation to the use and storage of the product. This is his or her responsibility alone.

*Disclaimer:*

This information is provided without warranty. The information is believed to be correct. This information should be used to independently determine the methods for protecting employees and the environment.
